

Desert Eagles Model Airplane Flying Club
Executive Board Meeting Minutes 8/21/2007
Library at 6:30 PM

- Walter Grasmick, Steve Henderson, Russ Crawford, and Don Brooks and were present. Elliot Sussman did not attend.
- We talked about the irrigation pump in general. The new priming system using an elevated barrel of water seems to be working very well. Dribbling some water over the radiator seems to prevent the overheating problem. I promised to hook up a more permanent arrangement but have not yet done so. Some sprinkler heads are not rotating and probably need cleaning.
- Jim Haldy is preparing a special event for Saturday: a spot stop and takeoff contest. Don Brooks will be giving pilot briefings on Friday, Saturday, Sunday and Monday.
- Some of the frequency pins need to be glued again. Also need to cover the top of the frequency panel to keep out sprinkler spray. Some sort of fastener or tie is needed at the bottom of the fabric cover to counter act the wind.
- Barry Cazier has a tractor mounted post hole auger that he will use some evening to dig the post holes for the fence.
- Steve Henderson reported about \$1100 in the treasury.
- Need to set up a standard schedule of events for the guidance of the next board.
- Need to create a handout for our meetings encouraging show-and-tells, special events (i.e. scale model contest with judges), etc. Put on the bottom of the attendance sheet?
- We need to come up with 4th-of-July entry for the parade. Something unique!
- Neither the County nor the Club is responsible for weed control per the lease agreement. Not a problem this year but can be after a wet spring.
