

Desert Eagles Model Airplane Flying Club

Meeting Minutes 6/4/2007 @ 7:30 PM

Location: Flying Field

- ! Walter Grasmick, Steve Henderson, Elliot Sussman, Don Brooks and Russ Crawford were the board members present. Eleven other members attended the meeting.
- ! Walter opened the Club meeting and talked about the new gate installed on the south entry road. We need to post a sign at the gate. The existing sign south of the pit area will be moved and installed next to the gate (not on the gate). Also the present names on the sign should be changed to one name and the club web site address. Henceforth, the gate will be locked and the new combination used. Those club members not in attendance at this meeting should call Steve Henderson or Walter Grasmick to get the new combination.
- ! The north gate is also to be locked. All combination locks have been changed to the new combination. The combination will be changed periodically in the future.
- ! We will notify the County and the mowing contractor (T & T) of the new combination.
- ! Don Brooks presented a Solo Certificate to Gene Balsmeier with congratulations and fanfare.
- ! Walter is changing the web site host to MicroServ (Kevin Hensley). There will be no visible difference to the users.
- ! Jim Haldy has changed all the nozzles in the pit area sprinklers and the system is working fine.
- ! Overheating of the irrigation pump is still occurring and the generator is still not charging the battery.
- ! Walter asked those people watering the field to donate the cost of the fuel to the club if they feel they can afford it.
- ! Steve gave the treasurers report and we have \$1617 in the bank.
- ! The board was requested to look at the amount needed for an assessment or an increase in dues. This will be presented at the next club meeting.
- ! It was decided to go ahead with the Tri-Club meet after 8 people volunteered to be responsible for a task. Those were: Brent, Walter, Steve, Bliss,, Gene, Don, Gary and Elliot. Some of the tasks are: mowing camp area, potluck dinner, parking area, etc.
- ! It was decided that the Open House will not be held this year because of the late date and no planning.
- ! Rexburg has an air show upcoming on the 16th that we should have a manned booth for advertising. Also at the Blackfoot event this summer.
- ! Don Brooks has completed a whole new set of frequency pins for our board. There are some Drilled pins that are to be used for spread spectrum radios. We need to recognize Fred Peterson's work on the frequency pins over the last several years.
- ! The next two club meetings will be at the field.
