

Notice written by our president, Brent Belnap.

(Edited by Walter Grasmick)

The February club meeting was a lot of fun. We had a lot of participants. Every member in attendance received a copy of the club by-laws. For the next few club meetings we will go over segments of the by-laws. This month's topic was "Noise Levels." Each club member will be expected to comply with the 95 decibels as described in the by-laws.

The board reported that they had been in contact with the AMA and were learning steps to take to a "Permanent flying site." They also reported that they are meeting with the County Commissioners to pay this month's lease and continue the friendly relations we have with the county.

Some really neat airplanes were displayed:

Bob Kershner displayed a 2 meter slope soarer and is looking for sites along the foot hills to fly.

John Oakley displayed an electric helicopter that had a small camera mounted on its nose.

Loren Marler displayed a scratch built Bearcat that is a Control line plane. The plane had dihedral, which is unusual for a control line plane. Great craftsmanship!

Doug Wood displayed a kit built Jameson Special that is a control line plane. It has an adjustable trim tab to help it fly stable. (Something that Doug needs) Doug can really fly those control line planes!

Jim Cripps Displayed a foam model of a plane that he converted to an electric airplane. It looked like it was going to be fast. Great colors, Black and Yellow!

Jim Haldy Brought a pretty good simulator that he downloaded from the internet for free, and bought parts on line for around \$20.00 that enabled him to connect it to a computer. Cool!

Brent Belnap donated a Balsa USA kit of a Stick 40. The club raffled it off to a lucky club member.

Next club meeting will be March 5<sup>th</sup>, at 7:30 at Aero Mark. We will talk about omitting the \$30.00 initiation fee, the meeting the board had with the county, and more on the club field.

Please bring your planes in for show and tell.

The big event will be, we will raffle off the kit Elliot Sussman donated. It's a Ultra Stick 60. So break open the piggy bank and plan to attend this meeting!!
